2014 Lotto Game
Player Segmentation

- May 15, 2014 -

Agenda

- Study Overview & Methodology (15 minutes)
- Explanation of the Segmentation Approach (20 minutes)
- BREAK (5 minutes)
- Introduction and Explanation of each Segment (25 minutes)
- BREAK (5 minutes)
- Segment Comparisons: (45 minutes)
 - Lotto Participation and MVP Club membership
 - Annualized Spending Analysis
 - Relative Size and Importance of the Segment
 - Relative Value (Indexed) per Segment Member
 - Favorite Lottery Game
 - Demographics
- BREAK (5 minutes)
- Preliminary Thoughts and Next Steps (30 minutes)

Lotto Game Player Segmentation

Study Overview & Methodology

About the Survey

- 1702 complete surveys collected.
 - 1326 surveys from MVP Club members (Jan 13 - Mar 3)
 - 376 surveys from Research Now panelists (Apr 11-22)
- The median survey length was slightly over 30 minutes.

Respondent Demographic Profile

	Total

STUDY SAMPLE WAS WEIGHTED TO REFLECT PROPORTIONS OF LOTTO SPENDERS IN NEBRASKA:

SPENDING DEFINITIONS

Non-spender = \$0 in a typical year

Peripheral = \$1-\$103 in a typical year (under \$2 a week)

Light = \$104-\$519 in a typical year (\$2-\$9 a week)

Moderate = \$520-\$1039 in a typical year (\$10-\$19 a week)

Heavy = \$1040+ in a typical a year (\$20+ a week)

	Total
Sample Size	1,702
Heavy Count Column %	122 7%
Moderate Count Column %	152 9%
Light Count Column %	669 39%
Peripheral Count Column %	760 45%

Survey Topics

- Screening Questions
- Typical Frequency & Spend on Lottery Games
- Favorite Lottery Games
- Spending Allocation Exercise
- Importance of Specific Purchase Decision Factors
- Importance of Specific Lotto Game Features
- General Questions
- Demographics

Key Screening Questions

- Personal Opposition to State-run Lottery gaming
- Did not purchased Nebraska Lottery Lotto games in the past 12 months
- Employed by any of the following:
 - A market research firm
 - A supplier of gambling products
 - The Nebraska Lottery or any of its contractors

Overall Lottery Profile Questions

- Typical frequency of play
- Typical spend over identified frequency
- Questions above were asked for each form of lottery game played in the past 12 months.
 - Powerball
 - Mega Millions
 - Nebraska Pick 5
 - MyDaY
 - Nebraska Pick 3
 - 2by2
 - Scratch games
- Favorite Nebraska Lottery games

Spending Allocation Exercise

Imagine you are at a lottery retailer and both Lotto and Scratch games are available for purchase. For EACH store visit, there are between 16-19 purchase options. For EACH purchase option:

- Choose the **quantity** you would purchase. Select a quantity of "0" from the dropdown if you would not purchase that option.
- Please make realistic purchases given how you would typically purchase each lottery game, taking into account: **jackpots, available promotions, and day of the week.**

Today is Monday!

“Typical” Play Frequency Groups by Lotto Game

	Powerball	Mega Millions	NE Pick 5	MyDaY	NE Pick 3	2by2
Regular	26%	17%	13%	2%	2%	3%
Occasional	24%	17%	12%	2%	3%	2%
Infrequent	47%	45%	36%	12%	18%	12%
Non-players	3%	21%	39%	85%	78%	83%
	100%	100%	100%	100%	100%	100%

PLAY FREQUENCY DEFINITIONS

Regular - Every week

Occasional - Every couple of weeks or
Every month

Infrequent - Every couple of months,
Every 6 months, or Once a year

Non-Players - Less than once a year or
Have never played

Avg. Annualized Spend by Play Frequency for that Game

	Played price point in PY	Regular Players	Occasional Players	Infrequent Players
Powerball	\$154.78	\$390.25	\$143.54	\$30.56
Mega Millions	\$90.10	\$235.35	\$119.68	\$23.21
NE Pick 5	\$111.70	\$370.30	\$116.32	\$17.15
MyDaY	\$77.23	\$538.00	\$92.43	\$12.18
NE Pick 3	\$69.41	\$606.95	\$95.94	\$13.63
2by2	\$95.45	\$447.5	\$94.19	\$11.10
Scratch Games	\$653.48	\$2,086.11	\$428.03	\$123.01

PLAY FREQUENCY DEFINITIONS

Regular - Every week

Occasional - Every couple of weeks or Every month

Infrequent - Every couple of months, Every 6 months, or Once a year

Interpretation Example:

- Players of Powerball games, regardless of their typical play frequency, spend an avg. of \$154.78 a year (or the equivalent of \$2.98 a week on Powerball).
- "Regular" (i.e. Weekly) Players of Powerball spend an avg. of \$390.25 a year (or the equivalent of \$7.50 a week on Powerball).
- "Occasional " Players of Powerball games spend an avg. \$30.56 (or the equivalent of \$0.59 a week on Powerball)

Lotto Game Player Segmentation

Explanation of the
Segmentation Approach

Segmentation Studies

- Goal is to provide lotteries and vendors with a framework for understanding/conceptualizing the marketplace through the use of identified segments.
- The key to segmentation is incorporating statements that will discriminate the broader audience in question in to like-minded sub-audiences whose behaviors and attitudes are similar within groups but noticeably different, on some elements, across groups.
 - Demographics (Age, Gender)
 - Attitudes
 - Psychographics
 - Behavior
 - Needs-based / Product-based

Attitudinal Scratch Segmentation

[Randomize]	Does Not Describe Me At All											Describes Me Very Well

I tend to spend more on Scratchers after I have won a Scratcher prize	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐	☐

About the Segmentation Approach for Lotto Games

- A hybrid product-based/behavioral/attitudinal (multi-variable) segmentation model.
 - The model is derived by how groups of PY Lotto players:
 - actually use Lotto Games;
 - what they want out of them; AND
 - how they “feel” (attitudinally) about the broad product category.
 - Segments are more “tangible” given they are primarily-derived from marketing/product-based variables.
 - Study findings are more “actionable” than a traditional attitudinal/psychographic segmentation.
- Axiom CR uses responses from 3 key questions to derive the segmentation of Lotto game players
 - Question #1 pertains to Purchase Decision Factors
 - Question #2 pertains to Lotto Game Attributes
 - Question #3 pertains to behaviors & attitudes towards playing Lotto games

Behavioral & Attitudinal Question Bank

How do you feel about each of the following statements on a scale of 1 to 7 where 1 means you "Disagree Completely" and 7 means you "Agree Completely"?

Typically, the main reason why I go in to a convenience store is to buy Scratch games.

I tend to know which lottery game(s) I am going to purchase before going in the store.

I feel awkward and uncertain when buying a Lotto game like Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, or 2by2

I don't like playing Lotto games (Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, or 2by2) because you have to wait until the numbers are drawn to find out whether you have won a prize.

I play Lotto games more often because I'm part of a lottery pool with my friends, family or colleagues.

I enjoy playing Lotto games (Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, or 2by2) more than Scratch games.

I only consider buying a Lotto game when I'm buying something else at the store.

Typically, the main reason why I go in to a convenience store is to buy Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, or 2by2.

I typically decide to purchase a lottery game at the last minute.

Being part of a lottery pool with my friends, family or colleagues makes playing Lotto games more fun.

I don't know how often every Lotto game is drawn each week, which makes it difficult to determine which game(s) to purchase (if any at all) on a given day.

22 Items included in the Purchase Decision Factors Question (E1)

1. The day of the week
2. The size of the jackpot for the next draw.
3. The game is drawn that evening meaning I don't have to wait long to find out whether I've won a prize.
4. The cost to play that game
5. The chances of winning the top prize / jackpot.
6. The chances of winning any prize.
7. The chances of winning a significant or meaningful prize.
8. The game is being promoted within the store.
9. The game is being promoted on TV or the radio.
10. The game is being talked about in the media.
11. The game is being talked about by friends, family, colleagues, or others I know.
12. There is a limited-time in-store offer of a free quick pick of a certain game with a qualifying purchase (example: "get a free quick pick for Mega Millions if you purchase \$6 worth of Scratch games").
13. There is a limited-time statewide discount offer for a specific game (example: "purchase \$6 of Mega Millions with Megaplier for \$5").
14. There is a limited-time statewide offer of a free entry for a 2nd chance drawing with a qualifying purchase (example: "purchase \$6 of Mega Millions with Megaplier and receive an entry for the chance drawing to win Huskers football season tickets").
15. The game is easy to play.
16. A game I have played before.
17. A game that has served me well in the past.
18. Knowing other players have NOT won much money playing a particular game at that store.
19. Knowing other players have won money playing a particular game at that store.
20. A suggestion from the clerk.
21. A suggestion from other players.
22. A game that I play as part of a lottery pool with my friends, family or colleagues.

Layout of the Purchase Decision Factors Exercise within the Survey (E1)

Which factor do you feel is the **MOST** and **LEAST important** to you personally when choosing a Lotto game (Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, 2by2) to purchase at the counter?

MOST Important		LEAST Important
☐	Knowing other players have NOT won much money playing a particular game at that store.	☐
☐	A suggestion from the clerk.	☐

22 Items included in Lotto Game Attributes Question (F1)

1. The game offers the chance to win a jackpot that is at least \$10 million and can grow to over \$500 million.
2. The game offers the chance to win a jackpot that is at least \$1 million and can grow to over \$10 million.
3. The game offers the chance to win a jackpot that starts at \$50 thousand and can grow to over \$150 thousand.
4. The game offers the chance to win a fixed top prize of \$1000 or less.
5. The game is drawn 6 or more times a week.
6. The game is drawn twice a week.
7. The game is only played in Nebraska.
8. The game is played across most states.
9. The game is only played in a handful of states.
10. A game that costs \$1 per play.
11. A game that costs \$2 per play.
12. A game with an appealing name.
13. The jackpot prize is split equally among multiple winners.
14. The prize is fixed (i.e. isn't split equally among multiple winners).
15. The jackpot prize is paid all at once.
16. You can choose whether you would want your jackpot prize in annual payments or one cash payment.
17. You can win a free Quick Pick Play for that game by matching a specific number of balls.
18. The game gives you the opportunity to choose both your numbers AND the bet type.
19. You select all of your numbers from one set of balls.
20. You select half of your numbers from one set of balls AND the rest of your numbers from another set of balls.
21. You select your numbers from one set of balls PLUS a "bonus ball" from another set of balls.
22. For \$1, you can purchase an add-on feature giving you the chance to win larger prizes on the game.

Attitudes Towards Lottery Games

Attitudes Towards Lottery Games

● Segment 1 ■ Segment 2 ▲ Segment 3 × Segment 4 ■ Segment 5

Typically, the main reason why I go in to a convenience store is to buy Scratch games.

Typically, the main reason why I go in to a convenience store is to buy Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, or 2by2.

I feel awkward and uncertain when buying a Lotto game like Powerball, Mega Millions, Nebraska Pick 5, MyDaY, Nebraska Pick 3, or 2by2.

I tend to know which lottery game(s) I am going to purchase before going in the store.

Preliminary Thoughts and Next Steps

Preliminary Thoughts

■ Characteristics of a Successful Segmentation

■ Segments should be: (Frank, Massey and Wind 1972)

- **Identifiable** - distinctly different on easily measurable variables
- **Substantial** - large enough to matter
- **Accessible** - reachable through marketing, advertising, and distribution efforts
- **Stable** - persist over time
- **Responsive** - respond to efforts aimed at them
- **Actionable** - differences are able to guide marketing decisions

Next Steps...

1. Name the segments

Next Steps...

1. Name the segments
2. Analyze the Spending Allocation Exercise by Segment

Imagine you are at a lottery retailer and both Lotto and Scratch games are available for purchase. For EACH store visit, there are between 16-19 purchase options. For EACH purchase option:

- Choose the quantity you would purchase. Select a quantity of "0" from the dropdown if you would not purchase that option.
- Please make realistic purchases given how you would typically purchase each lottery game, taking into account: jackpots, available promotions, and day of the week.

Today is Monday!

Next Steps...

1. Name the segments
2. Analyze the Spending Allocation Exercise by Segment
3. Using the segment classification tool within a state-wide general population survey:
 - Size the segments
 - Get accurate demographics
4. Possibly conduct follow-up research to uncover supplemental insight about specific segments of interest.
